About us. Sobre nosotros

ARKAIS|LLAC, a company with extensive experience in the creation of exclusive display solutions, both technical and aesthetic, for the ceramics and construction sectors.

Our engineering department is made up of qualified professionals capable of designing and adapting any space specifically to the needs of each client, providing added value to each project.

We work with the latest technology on the market, which allows us to achieve the best production results and develop any type of proposal requested by our clients. Thus, we offer a personalised and tailor-made service.

In line with our Corporate Social Responsibility, at ARKAIS | LLAC we are committed to an exhaustive management of the entire production process that allows us to reduce the amount of waste generated, as well as a meticulous control of atmospheric pollution in order to protect the environment.

ARKAIS|LLAC, es una empresa con una larga experiencia en la creación de soluciones expositivas exclusivas, tanto técnicas como estéticas para el sector cerámico y de la construcción.

Nuestro departamento de ingeniería está formado por profesionales cualificados capaces de diseñar y adaptar cualquier espacio a las necesidades específicas de cada cliente, aportando así un valor añadido a cada proyecto realizado.

Trabajamos con la última tecnología del mercado, esto nos permite conseguir los mejores resultados de producción y desarrollar cualquier tipo de propuesta que nos soliciten nuestros clientes. Ofreciendo así, un servicio personalizado y hecho a medida.

Atendiendo a nuestra Responsabilidad Social Corporativa, en ARKAIS | LLAC apostamos por una gestión exhaustiva en todo el proceso productivo que nos permite reducir el número de residuos generados, así como un minucioso control de la contaminación atmosférica con el objetivo de proteger el medio ambiente.

Environment. Medioambiente

ARKAIS|LLAC is highly sensitive to the environment, which is why we carry out exhaustive management in all our production processes in order to protect the natural habitat.

We have particle aspiration systems with filters to avoid atmospheric pollution, recovering by means of a separating aspiration system, all those particles that are produced in the different processes of sectioning, sanding, painting,...

The use of "water-based varnishes" is becoming increasingly important, which considerably minimises the emission of VOCs into the atmosphere.

The different types of waste generated in the different production processes are stored in clearly marked and conditioned areas for subsequent management by authorised waste managers.

En ARKAIS|LLAC estamos enormemente sensibilizados con el Medio Ambiente, por ello realizamos, una gestión exhaustiva en todos sus procesos productivos, con el fin de proteger el hábitat natural.

Disponemos de sistemas de aspiración de partículas con filtros para evitar la contaminación atmosférica, recuperando mediante un sistema de aspiración separatista, todas esas partículas que se producen en los diferentes procesos de seccionado, lijado, pintado,...

Cada vez más importante la utilización de «Barnices al agua», hace que se minimice considerablemente, la emisión de COV'S a la atmósfera.

Los diferentes tipos de residuos que se generan en los procesos productivos son almacenados en zonas perfectamente señalizadas y acondicionadas para su posterior gestión a través de gestores autorizados.

ARKAIS|LLAC is committed to continuous improvement in the development of processes and the implementation of the quality system.

This commitment is reflected in agile management and a constant increase in the quality of its products, as well as the service to its customers, as defined in the Quality Policy of both companies.

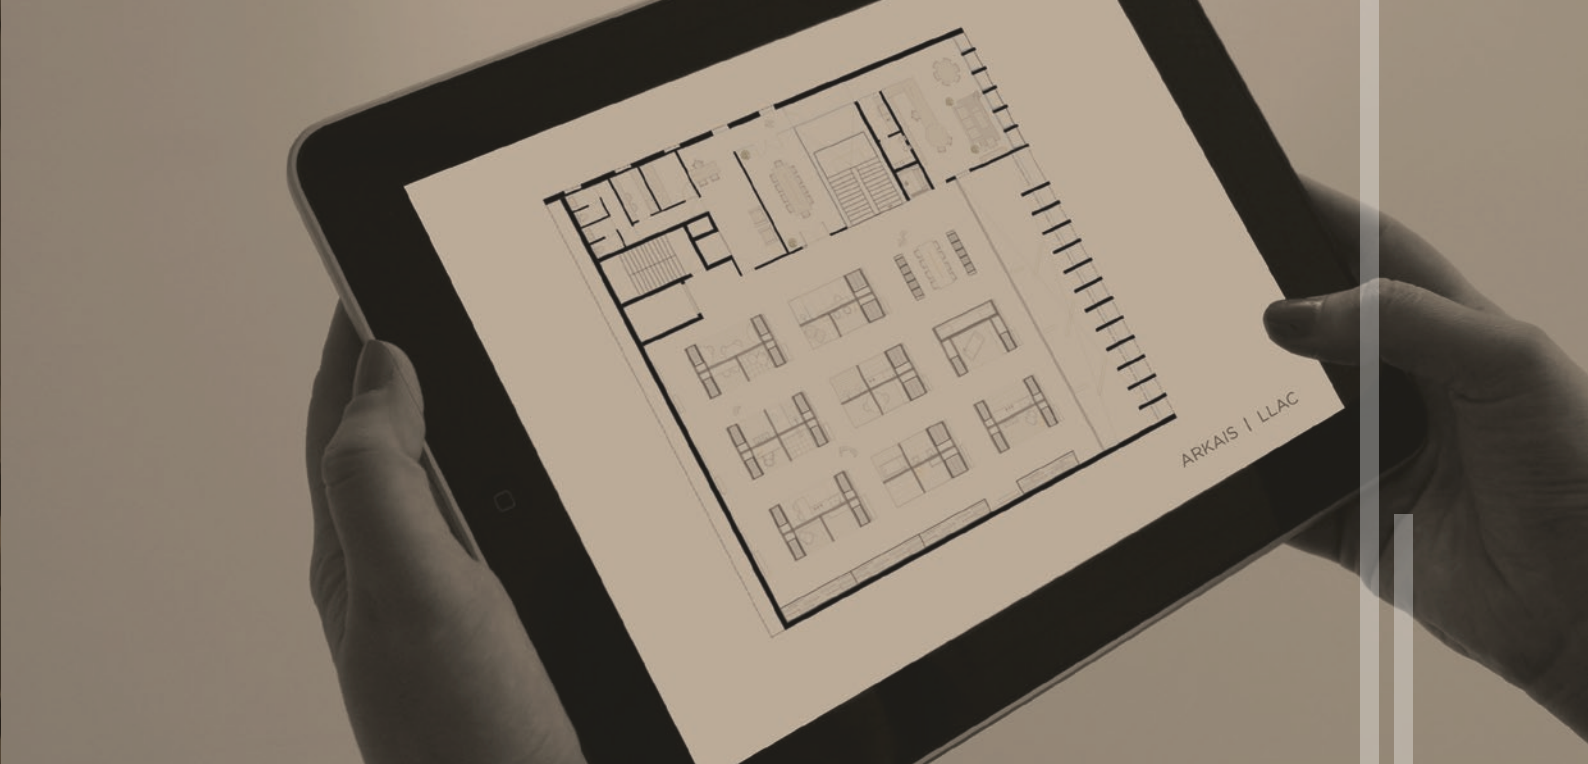

The measurement of processes by means of effectiveness, efficiency and flexibility indicators allows for their continuous improvement, assessing the need to make changes, establish priorities, assign resources and detect structural needs. This is why for ARKAIS-LLAC, QUALITY and SERVICE are of the utmost importance.

Quality. Calidad

Es compromiso de ARKAIS|LLAC la mejora continua en el desarrollo de procesos y la implantación del sistema de calidad.

Este compromiso se refleja en una gestión ágil y un incremento constante en la calidad de sus fabricados, así como el servicio a sus clientes, definido en la Política de Calidad de ambas empresas.

La medición de procesos mediante indicadores de eficacia, eficiencia y flexibilidad, permite su continua mejor, evaluando la necesidad de proceder a cambios, establecer prioridades, asignar recursos y detectar necesidades estructurales. Es por todo ello por lo que para ARKAIS-LLAC, la CALIDAD y el SERVICIO es lo más importante.

Production. Producción

We have a complete production process, from design to manufacture and assembly of all the components of the product, equipped with the most modern industrial systems for the treatment of wood and metal in continuous renovation and expansion.

- Wood section consisting of: sectioning machines, pantographs, edge banding machines, etc.
- Painting section: with spray application in a pressurised cabin and controlled drying.
- Control and pre-assembly section.
- Warehouse section.
- Loading section or area.

We have the technical and productive capacity to respond to any customer need, having a large warehouse of raw materials and finished products, perfectly optimised, which enables us to provide a rapid response. The studied packaging of the manufactured products, whether small, medium or large volume, allows us to guarantee perfect storage and delivery anywhere in the world, whatever the quantity, in perfect conditions.

En Arkais|Llac disponemos de un completo proceso de producción, que abarca desde el diseño hasta la fabricación y montaje de todos los componentes del producto, dotado de los más modernos sistemas industriales de tratamiento de la madera y del metal en continua renovación y ampliación.

- Sección de madera formada por: seccionados, pantógrafos, chapadoras de cantos, etc.
- Sección de pintura: con aplicación a pistola en cabina presurizada y secado controlado.
- Sección de control y premontaje.
- Sección de almacén.
- Sección o zona de carga.

Tenemos la capacidad técnica y productiva para dar respuesta a cualquier necesidad del cliente, disponiendo de un gran almacén de materia primas y productos terminados, perfectamente optimizado, que nos posibilita dar una respuesta rápida. El estudiado embalaje de los productos fabricados, tanto de pequeño, medio o gran volumen, permite garantizar un perfecto almacenaje y entrega en cualquier parte del mundo, sea cual sea la cantidad, en perfectas condiciones.

Services. Servicios

ENGINEERING:

Engineering department with great professionals to create solutions.

DESIGN:

We update and design any corner adapting it to the client's needs.

ADVANCED TECHNOLOGY:

Work with the latest technology both in our offices and in the machines for production.

RSC:

Corporate Social Responsibility with the Environment. Reducing waste to take care of our planet.

CUSTOMIZED PROJECTS:

We make any client's proposal a reality. Offering the advice of our professionals.

ONE CLICK:

Request a quote for any of our services with just one click.

INGENIERÍA:

Departamento de ingeniería con grandes profesionales para crear soluciones.

DISEÑO:

Actualizamos y diseñamos cualquier rincón adaptándolo a las necesidades del cliente.

TECNOLOGÍA AVANZADA:

Trabajamos con la última tecnología tanto en nuestras oficinas como en las máquinas para la producción

RSC:

Responsabilidad Social Corporativa con el Medio Ambiente. Reduciendo los residuos para cuidar nuestro planeta.

PROYECTOS A MEDIDA:

Hacemos realidad cualquier propuesta del cliente, ofreciendo el consejo de nuestros profesionales.

ONE CLICK:

Solicita presupuesto del cualquiera de nuestros servicios con un sólo click.

* Este catálogo muestra las características básicas de los artículos referenciados en su descripción. Para ampliar la información, o conocer otros productos no mostrados en este catálogo, no dude en llamar a nuestro departamento comercial, donde le atenderemos personalmente.

Todos los expositores mostrados en este catálogo son personalizables según las necesidades del producto, o según las dimensiones de los espacios expositivos, realizando diseños totalmente adaptables según las características de cada proyecto.

* This catalogue shows the basic characteristics of the articles referenced in its description. For further information, or to find out about other products not shown in this catalogue, please do not hesitate to call our sales department, where we will attend to you personally.

All the displays shown in this catalogue can be customised according to the needs of the product, or according to the dimensions of the exhibition spaces, creating designs that are fully adaptable to the characteristics of each project.
